

Assess & Strengthen Your Security Posture

# Managed Risk & Compliance

## Streamline Your Risk and Compliance Efforts

Get a holistic view of your company's risk posture and compliance status through an intuitive AI-based platform. We build a detailed security roadmap that guides your mitigation efforts and streamlines key risk management tasks. A member of our security team will work closely with you to move you toward compliance and strengthen your defenses.

### Core Service:

Consultation  
Risk Analysis  
Security Roadmap  
Vulnerability Scanning  
Policy Guidance  
Tabletop Readiness Exercise

## Integrated Dashboard, Reports, and Policies

Track risk ratings, policies, vulnerability scan results, and tasks in a single, intuitive dashboard for high visibility into your risk and compliance management process.

Assess & Strengthen Your Security Posture

# Managed Risk & Compliance

## Managed Risk & Compliance: What's included?

**Security Consultation** - A member of our security team helps you with roadmap tasks, best practice guidance, and facilitates the monthly status meetings.

**External Vulnerability Scanning** - We will complete a monthly external vulnerability scan to find weak points where threats could infiltrate.

**Risk Analysis** - We will conduct a thorough onboarding process by guiding you through multiple assessments to generate an initial risk posture that automatically updates as tasks are completed.

**Security Roadmap** - At the core of our platform is a security roadmap with specific tasks that are ranked by level of severity. It's the driver to move you toward compliance.

**Policy Guidance** - You will have access to multiple security policies that are aligned with industry frameworks such as NIST or CIS. Policies can be used to augment existing policies or create new ones.

**Tabletop Incident Readiness Exercise** - Two virtual planning exercises will help you ensure that you are ready to respond in the event of a cyber attack.

### Add-Ons:

- Risk Assessment
- Security Assessment
- Penetration Testing
- Security Awareness Training
- Internal Vulnerability Scanning
- Policy & Plan Development
